Maximum Marks	4 Marks

Empathy Map

To ensure a truly learner-centric architecture, the platform was modeled using an Empathy Map Canvas focused on the primary student persona. This framework guides how the AI handles diverse psychological and intellectual states:

SAYS

- "I'm confused about this topic."
- "I don't know where to start."
- "I need help understanding this concept."

THINKS

- Will I complete my assignments?
- Maybe I'm not learning fast enough.
- I wish I had personalized guidance.

DOES

- Searches online for explanations.
- Watches tutorial videos.
- Asks teachers or friends for help.

FEELS

- Confused while studying.
- Frustrated after repeated failures.
- Motivated when receiving personalized support.
