

Project Demo Planning

Date	03-07-2026
Team ID	
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Project Overview	Introduce the project, explain the problem statement, objectives, and provide an overview of the technologies used, including Python, Streamlit, BiLSTM, BERT, and Google Gemini API.	50 sec	Sravya Yadlapalli
2	Model Training (Epic 2)	Demonstrate the model development process, including Kaggle setup, data preprocessing, BiLSTM training, domain-adaptive fine-tuning, BERT fine-tuning, model evaluation, and model export.	2 min 32 sec	Sravya Yadlapalli
3	Emotion Detection Pipeline (Epic 3)	Explain the complete prediction pipeline, including text preprocessing, BiLSTM and BERT classifiers, mixed emotion detection, unified prediction schema, and CSV persistence for storing prediction history.	2 min 44 sec	Kilari Bhavana
4	AI Integration & Application Demonstration (Epic 4 & 5)	Demonstrate the Streamlit application, Google Gemini API integration, AI-generated recommendations, session history, analytics dashboard, Plotly visualizations, and overall user interaction.	3 min 26 sec	Sravana Bandi

5	Epic – 6, Project Setup, Documentation & Deployment	Explain the project setup, environment configuration, API key management, virtual environment, folder structure, ER diagram, project workflow, testing process, deployment, and documentation.	3 min 29 sec	Priyanka Jupudi
6	Conclusion & Future Scope	Summarize the project outcomes, discuss future enhancements such as cloud deployment, multilingual support, voice-based emotion detection, and answer questions from the evaluators.	29 sec	Sravya Yadlapalli

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for AI-based emotion detection and personalized learning support for students.
2	Solution Overview	Present the system architecture, technologies used, and overall project workflow.
3	Live Feature Demonstration	Demonstrate user login, emotion detection, AI-generated recommendations, analytics dashboard, and session history using the Streamlit application.
4	Q&A Session	Address questions, explain implementation details, and discuss future improvements.
